

4 Channel A/V Modulator

HillsTM
Antenna &
TV Systems

The Hills Home Integrated Systems Modulator processes Audio and Video signals from DVD Players, VCRs, Set-Top-Boxes, Security Cameras etc. for coaxial-cabled distribution to multiple outlets around the home. Each of the four channels can be independently assigned to any UHF channel. A feedback path for Infra-red Remote Control Signals from all output ports to the input enables these signal sources to be remotely controlled from anywhere near the outlets. (Note IR feedback requires optional targets and emitters.)**

Specifications/Model	4-Channel A/V Modulator
Product Code	FC658139
Frequency Range	520MHz - 820MHz (CH27 - CH69), each channel independently programmable
Output Level	75dB μ V
Input/Output Impedance	75 Ω
Return Loss	>15dB typ.
Power	12V / 500mA Plug Pack

** Hills Emitter Part No. BC3042 Hills Target Part No. BC3041

Features:

- Low Cost PAL TV Modulation
- Frequency Agile, Fully Programmable Output
- Ideal for use with VCRs, DVD Players, and Security Cameras etc.
- 4 Remote Control Repeater Outputs
- F Connector for TV Signal
- RCA Connectors for Audio and Video Signals
- Fully Shielded Housing
- Easy Installation and Programming
